DATE MAILED:

Please find below and/or attached an Office communication concerning this application or proceeding.

Commissioner for Patents

The following is an examiner's statement of reasons for allowance: The claims are allowable due to the recitation of the microspheres remaining predominantly separate until after the last microsphere has been created, thus reading over Bille et al (US Patent No.4,907,586) as set forth in applicant's remarks submitted with the instant amendment. The claims additionally read over Bille et al (US Patent No. 5,246,435) by for the reasons set forth with regard to Bille et al (U.S. Patent No. 4,907,586) and further by virtue of specifying that the elements the are created are "microspheres". These are defined in the originally filed disclosure as having a diameter "in the range of about 60-15,000" cubic microns corresponding to a sphere of diameter 5-30 microns (see the originally filed disclosure at page 24, the paragraph labeled [051]), while the incisions of Bille et al (U. S. Patent No. 5,246,435) are described as "minute" (see the Abstract), they are 2mm X 500microns X "a few microns" (see Bille et al (U. S. Patent No. 5,246,435,column 6, lines 24-30), which would result in a volume of at least 1,000,000 cubic microns, even assuming that "a few microns" could be interpreted as "one micron", thus the incisions of Bille et al, at their smallest are over ten times larger than the largest microspheres, as defined in the originally filed disclosure. It is noted that RE40,420 is not prior art to the instant case, since the subject matter of the instant claims goes back to provisional application 601013,791, filed March 21, 1996, which is prior to August 29, 2000, the earliest filing date of RE40,420. The claimed subject matter also does not interfere with the subject matter claimed in claims 24-38 of Dick et al (RE40,420), due to the recitation of "microspheres" which have a given range of dimensions, as set forth above while the "blisters" of Dick et al are disclosed as having no particular dimension. Further, the instant method requires no particular pulse width, while the method of Dick et al specifically recites a range of pulse widths, which is not required by the instant claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee.

Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
